DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-4 and 7-36 are rejected under 35 U.S.C. 102(e) as being anticipated by Janzen (U.S. 6,126,674).

Note Janzen discloses in figures 1-4, a movable part (22) is movable relative to a main part (20) which is guide with guides (26,30), a locking device (48) having a first position, whereby the movable part (22) is arranged in a working position and in an initial position (as shown in fig. 4) and wherein the locking device (48) having a second position, whereby the movable part (22) is taken apart from the main part (20) (as shown in fig. 1) for cleaning and sterilization; and a releasable articulated connection (at 40) disposed between the movable part (22) and the actuatable handle portion (12), wherein said connection (at 40) includes a U-shaped seating (42) and a pin (38) on the movable part (22) mounted in the U-shaped seating (42).

Allowable Subject Matter

3. Claims 5 and 6 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Chin et al. (U.S. 5,582,618) discloses a surgical instrument.
